CRIMEVISION AI — FORENSIC ANALYSIS REPORT

CONFIDENTIAL & AUDIT-TRACKED DIGITAL EVIDENCE INTELLIGENCE

Case Identifier:	`case_d9baa2028b5b`	**Report Date:**	2026-10-18 14:16:17 UTC
Case Name:	Test Case	**Case Status:**	ACTIVE
Description:	No description provided.	**Evidence Count:**	1

Evidence #1: crimevision_test_video.mp4 (VIDEO)

Evidence ID:	`ev_261b017a2726`
Original Filename:	crimevision_test_video.mp4
Cryptographic SHA-256:	`2759bda55db6645dc92656f4ea2ebad036186cd8da3bc2ea58483be86d07fb2c`
File Size / Ingest Date:	307,679 bytes | Ingested: 2026-10-18T13:31:35.378860+00:00
Analysis Pipeline State:	ANALYZING

1. Video Stream Ingest Metadata

Duration / Total Frames:	`0.00 s | N/A frames`
Resolution / Framerate:	0x0 @ 0.0 fps
Container Codec:	N/A
Aggregated Detections:	0 object(s) across 0 sampled frame(s)

2. Sampled Frame RT-DETR Detections Timeline

Video frame sampling and analysis pending or not executed.

Forensic Notice: Sampled frame analysis captures discrete snapshot intervals. Frame detections do not demonstrate continuous activity, intent, or comprehensive event reconstruction during unanalyzed intervals.

LEGAL & FORENSIC DISCLAIMER: This document contains machine-assisted observations generated by deep learning models (RT-DETR, CLIP, BLIP, OpenAI Whisper, OpenCV Frame Sampler, Multimodal Fusion). AI outputs do not constitute scientifically definitive proof, judicial findings of fact, speaker identity verification, or unassailable certainty. Detected bounding boxes, scene descriptions, semantic similarity rankings, audio transcripts, video frame timelines, and cross-modal correlations must be independently corroborated by qualified digital evidence examiners. Hash values guarantee digital provenance and file integrity as ingested.
